

Don't let paperwork be the pest

Brother mobile print solutions:
Print and organise wherever you are,
so nothing gets away.

Hello [recipient name],

When real pests are your business, don't let tedious paperwork be another. Discover a single solution: Your mobile device running **Azura AZ1 pest management software**, wirelessly attached to a **Brother mobile printer**.

The solution allows you to manage appointments, email data and documents directly to head office, and print reports and regulatory notices onsite to:

- **Cut down administration times**
- **Enhance customer service**
- **Reduce travel times and costs**
- **Enable business growth**

There's ordinary management – with poorly legible carbon copies floating about and reporting to catch up on when you're back in the office. And then there's an integrated model for the future.

Find out more about our solution, including how it enabled a business like yours to save more than 2,000 man hours per year.

And do **get in touch** for a chat!

Yours sincerely
