

E-WorkBook<sup>10</sup>  
*Let's achieve*

# Simply put...

R&D is hard enough. That's why research tools and systems shouldn't be, or so you told us. And we listened.

Meet E-WorkBook 10 and discover high-powered performance that's also an investment in simplicity.

**Spend less time looking  
and more time finding**

Ask any scientist what they'd rather focus on and they'll tell you it's the science. And when resources are under pressure, you need an ally in your data management platform. With E-WorkBook 10, your software becomes a help, not a hindrance. Thanks to an interface that's designed around simplicity and usability, your data management becomes smarter and faster. It's less clicking and searching. It's answers, found.

## Push boundaries, not paper

You need to turn your data into insights. But you don't want to add another layer of complexity to your workflows. Replacing paper in the lab replaces searching with finding, bringing you greater insights. With a single platform for managing all your R&D data workflows, isn't it time you left the paper prison? Find the way out with E-WorkBook 10.

Because a problem shared is a problem halved. That's the simple foundation of collaboration. And if you're working with colleagues in different departments and even different continents, or peers in another organization, you need the right tools. E-WorkBook 10 gives you a platform for the easy sharing and integration of data, while protecting your company intellectual property (IP). It's turning ideas into data, and data into results.

# Keep the facts at your fingertips, from set-up to write-up

#### WHERE YOU WANT

E-WorkBook 10 allows you to work on different devices and operating systems.

#### HOW YOU WANT

Desktop or web client – choose the right way of working for you.

#### WITH WHO YOU WANT

Define user views and access and scale your deployment to suit your needs.

We don't think you should be tied to your workstation. You should be working how you want, where you want. That's the thinking behind our new web client in E-WorkBook 10. It frees you from being limited to one operating system or device and means you can work anywhere via your company network connection. Get the insight from your data you need, where you need it.
